

Children, teachers and parents all over the world love LOGICO®

## International Availability of LOGICO®

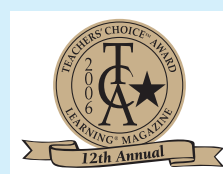

LOGICO is available in over 40 countries worldwide.

Find distributors' addresses on our website:  
[www.finken.de/where-to-buy](http://www.finken.de/where-to-buy)

## LOGICO® – A story of success

Teachers, principals and ministries of education in many countries recommend LOGICO. Over the years it has received several awards.

### Recent Review

Enjoyable for Children—We found that the children genuinely enjoyed playing and learning with the Logico Primo. They loved its toy-like appearance—it truly feels like a toy with its bright coloured, chunky buttons to move. They were also engaged by the interesting topics and lovely illustrations. The activities are short, snappy and fun and keep a young child's attention. We also noticed the children had a real sense of satisfaction and pride when they completed each card correctly—great for building confidence in learning.

—The SEN Resource Review (May 2019)

## Simple Unique Compact

DCCED

Finken

LOGICO® – Learning with fun and self-checking...

- Children learn basic skills in a playful way
- Supports communication and language development
- Training of motor skills by moving the colored buttons

- Ideal for independent learning activities
- Learning cards for all major school subjects
- For all levels in regular lessons and support classes

- For reinforcement and rehearsal
- For learning individually or together
- Highly motivational

This is how it works:

1

Place the card into the slot so you can see the questions.

2

Answer the questions and move the colored buttons to the correct answers on the right.

3

Turn the card over and place it in the slot again to check the answers.  
Your answers are correct if the color codes match.

The diagram illustrates the three-step process of using the LOGICO game. Step 1 shows a card being placed into the board's slot. Step 2 shows a child moving colored buttons to match the answers on the card. Step 3 shows the card being flipped to reveal the correct answers, with a red arrow pointing to a matching button and the word "right!" written above it.

For every age group, there is the right version.

**Logico Gameboard**

**LOGICO PRIMO gameboard** **\$29.95**

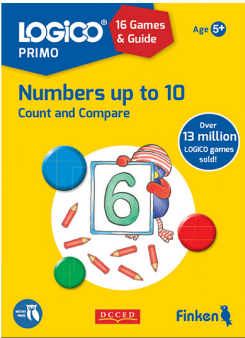

The LOGICO® PRIMO range is well suited to children 3 to 6 years of age. It includes 6 coloured buttons on the board so each learning card has 6 problems to solve. This range is designed to teach colours, shapes, observation, sequencing, visual perception and counting, to name a few. The cards are made from durable card and are laminated to protect them from spills and tears.

**LOGICO PICCOLO gameboard** **\$29.95**

The LOGICO® PICCOLO range is recommended for children 5 to 9 years of age. The board includes 10 coloured buttons making for more problem solving and an increased challenge. The PICCOLO range assists with school and reading readiness and includes mathematics, logical thinking, sequencing, map reading skills and many more. Once again, children can check their own answers by referring to the reverse side of the card.
